Professional Profile

Computer Science graduate and IT Specialist with hands on experience in Full Stack web development. Contributed to the development and maintenance of four national education platforms at Kenya's Ministry of Education, building REST APIs with PHP and Laravel, developing responsive React interfaces, and working with MySQL and PostgreSQL databases. Currently builds custom business applications and API integrations at Growmore Technology Africa Limited to automate workflows and streamline reporting. Experienced in testing features, debugging application issues, documenting changes, and supporting users of TallyPrime and ERPNext.

Career Summary/ Experience

Information Technology Specialist – Growmore Technology Africa Limited

September 2026 – Present

- Design, develop, and maintain custom business applications that automate manual workflows and streamline reporting.
- Build and test software features and REST API integrations, troubleshoot bugs, and document application changes.
- Configure and support TallyPrime and ERPNext for invoicing, inventory management, and reporting, and train users on daily workflows.
- Configure routers, switches, and wireless access points, and troubleshoot connectivity and access issues on client networks.
- Install and configure CCTV cameras and recorders, verify camera coverage and recording, and set up remote viewing for clients.

Full-Stack Software Developer Intern – Ministry of Education Headquarters, Nairobi, Kenya

October 2025 - August 2026

- Developed and maintained four national education platforms: School Data Verification System, Elimu Trees, Education Emergency System, and Staff Reporting and Task Management System.
- Built responsive, accessible, and user-friendly interfaces using React, JavaScript, HTML, CSS, and Tailwind CSS across desktop and mobile devices.
- Developed secure backend systems and RESTful APIs using PHP, Laravel, and Python for authentication, reporting, task management, and data verification.
- Designed and managed MySQL and PostgreSQL databases, including data modelling, migrations, validation, query optimisation, and data integrity.
- Collaborated with Ministry stakeholders and technical teams to gather requirements, test features, troubleshoot issues, and deploy reliable digital solutions supporting national education programmes.

Cloud Security Specialist Trainee, Serianu Limited, Nairobi, Kenya

April 2025 – August 2025

- Assisted in reviewing Azure environments for common security issues using Microsoft Defender for Cloud, Azure Security Center, and Entra ID logs.
- Helped implement basic security controls including RBAC role reviews, MFA enforcement, Conditional Access, and secure configuration of Storage Accounts and Key Vault.
- Supported monitoring and incident investigations by analyzing alerts from Defender for Identity, Defender for Cloud Apps, and Log Analytics workspaces.
- Participated in creating simple Azure CLI and PowerShell scripts to identify misconfigured resources and generate security reports.
- Contributed to documentation and security baseline checklists aligned with CIS Azure Benchmarks and Serianu's internal cloud security practices.

Cybersecurity Intern, Hack Secure, India (Remote)
May 2025 – June 2025

- Assisted in conducting vulnerability assessments and identifying security weaknesses across client systems and web applications.
- Participated in red-team simulations and hands-on ethical hacking exercises using tools such as Maltego, Knockpy, and Dirb.
- Supported security incident analysis by reviewing logs, investigating alerts, and documenting potential threats.
- Helped implement cybersecurity best practices across cloud and network environments to enhance overall security posture.
- Contributed to the preparation of technical reports, outlining findings, risks, and recommended mitigation strategies for clients.

ICT Attaché - Eldoret International Airport, Eldoret, Kenya
May 2023 – August 2023

- Monitored and maintained network security infrastructure, contributing to reduced downtime and improved system reliability.
- Assisted in the configuration and troubleshooting of CCTV systems, strengthening airport security and surveillance integrity.
- Supported 50+ network devices with security-focused troubleshooting to maintain consistent and secure connectivity.
- Resolved daily hardware and software issues with attention to secure system operations, improving response time by 25%.
- Documented IT procedures and incident reports to support security awareness, traceability, and operational continuity.

Professional development and certification

2025 – **Kubernetes and Cloud Native Associate (KCNA)** - John Orengo
2025 – **Hack Secure: Cybersecurity Intern -** John Orengo
2025 – **Microsoft Certified: Security, Compliance, and Identity Fundamentals -** John Orengo
2025 – **Amazon Web services:** AWS re/Start Graduate –John Orengo
2025 – **Amazon Web services:** AWS Certified Cloud Practitioner - John Orengo
2020 – **KCA University:** Certificate in Computer applications

Education and Qualifications

Bachelor of Science in Computer science (Second Class Upper) - Oct 2020 – Oct 2024
The Catholic University of Eastern Africa

Kenya Certificate of Secondary Education - Feb 2016- Nov 2019
Kisumu Boys' High School

Skills and competency

Soft skills

- Communication skills
- Team leadership
- Problem solving skills
- Adaptability and Versatility
- Passion for Technology and continuous Learning

Technical skills

- PHP, Laravel, Python, JavaScript, React, HTML, CSS, Tailwind CSS
- RESTful APIs and full-stack web development
- AWS – EC2, S3, RDS, Lambda, CloudWatch, DynamoDB, VPN
- Hardware and software troubleshooting
- Networking – TCP/IP, VPN, connectivity and troubleshooting
- MySQL, PostgreSQL, SQL – Database management
- Microsoft Azure – Cloud infrastructure and security
- Linux – Administration and troubleshooting
- Network devices and ICT infrastructure support
